

Rapid Refresh™ PPE Organizer

The Rapid Refresh™ PPE Organizer is a convenient dispensing system for personal protection items.

Clearly Durable, Efficient & Convenient

Clear: The clear and open design enhances compliance by allowing clinicians to find the exact protection they need instantly. Product availability is easier to verify and simplifies restocking.

Durable: High-grade acrylic will withstand years of harsh treatment and thousands of trips to Central Supply for restocking.

Customizable: Allows staff to effectively organize and dispense the essential supplies exactly where they need them. In addition to the standard glove, mask and gown bins, organizers can be designed to include items such as sign clips, coat hooks, supply bins, and other brackets. This offers convenient storage and placement of additional supplies as needed.

Organizers are adjustable for inevitable product or manufacturer packaging changes and can be mobile or permanently mounted on walls, doors or glass.
